

# Transition Planning Seminar

March 10<sup>th</sup> 7-8:45pm

South River Middle School Library

Special Guest Speaker: Alice Hunicut

Once again, SEPTA is extremely pleased to be able to present a transition planning seminar for parents of students with disabilities who are or will be entering transition planning as part of their I.E.P.

Transition planning concerns student ages 14-21 years of age who are classified or section 504. This essential component of a student's I.E.P. is an important part needed to address and prepare for life skills / job placement/ and adult services such as government assistance and various government / state programs, transportation skills and community supports to help the student succeed in having productive and smooth transition to life after public/private school.

Alice Hunicut presented this workshop to our members and the community last year- parents were extremely pleased with the wealth of information and direction she supplied during her last seminar.

***Don't miss it!***
